

# Your home in a whole new light

## Shading solutions that put you in control

Let light complement your mood and transform the way you feel.

Think about how your mood changes when a drab, cloudy morning turns into a sun-kissed day, and then that bright afternoon sun softens into an evening dusk. You go from feeling lackluster to energized and then relaxed.

### **The reason is light.**

Light not only changes the look of the day, but also affects the way you feel. Wouldn't it be nice to adjust the amount of daylight in your home to complement your mood and even transform it?

With Lutron, you have the power to do that. The press of one button can shape the lighting in a space to create the perfect atmosphere for any activity.
